

12.27May.Web & Database Server

Saturday, May 27, 2023 4:38 PM

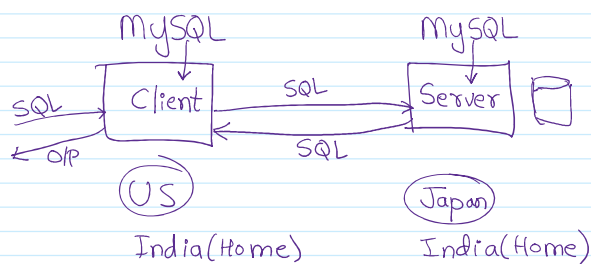

Database Server

- why.
- How it work.
- How to Prepare.

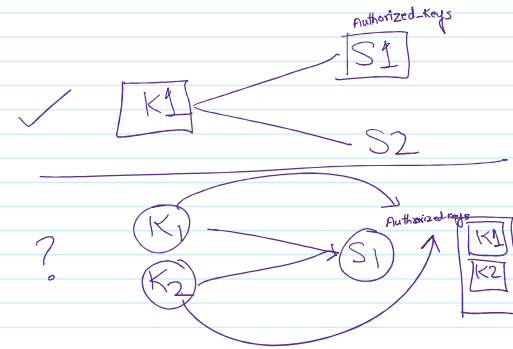

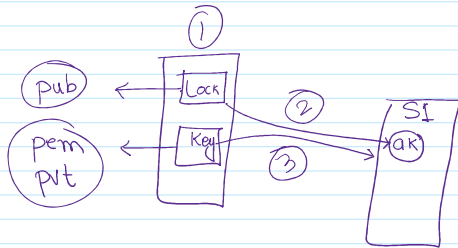

- Store structured format Information
- Huge Records
- Analyse records (SQL)

AWS EC2 Instance

1] Firewall (Security Group) → Control/Unauth User.

2] Key → Access Server

1] Create Key Pair in aws

2] Create Lock & Key using SSH-keygen.

using rename

id-rsa → Key

idrsa.pub → Lock.pub

3] Order EC2 Server.

• Key Pair • Security Group (Firewall)

• ubuntu • t2.micro

4] Connect using aws Console (website)

5] append Lock.pub → authorized-keys

~/.ssh/authorized-keys

6] Connect Server using ssh

Command & Use key.
